

Certificate III in Information, Digital Media & Technology

Course Overview

ICT30115 Certificate III in Information, Digital Media and Technology can provide the skills you need to develop as an advanced ICT user.

This course builds upon the basic IT training undertaken in the Certificate II in IT to allow you to become proficient in a wide variety of ICT technical functions.

It will furnish you with specific ICT training and employability skills that will enable you to work in a number of diverse roles within the IT industry including network administration, web and digital media technologies, or software applications.

The Certificate III in Information Technology qualification could position you to work as a help desk officer or assistant, an ICT operations or user support person, or to work in PC or technical support.

Outcomes
